

Long Thumb Spica II

Ideal Application

The Long Thumb Spica II (LTS II) provides stabilization to the thumb in abduction, metacarpophalangeal (MCP) joint, carpometacarpal (CMC) joints, distal radius, distal ulna and conditions where immobilization of the wrist in the sagittal and frontal plane is required. The LTS II may be used preoperative, postoperative, post-traumatic as well as for Carpal Tunnel Syndrome (CTS).

Features and Benefits

- Increased forearm length
 - *Better immobilization*
- Velcro release tab
 - *Allows brace to open more fully*
 - *Easier application*
- Edge taping around perimeter of thumb
 - *Added comfort*
- Adjustable thumb circumference
 - *Accommodates a variety of thumb sizes*
