**FOR IMMEDIATE RELEASE**

***DJO Global's MotionMD® Software Solution Meets Industry Standards  
for Information Privacy and Security with HITRUST CSF Certification***

**SAN DIEGO, CA July 11, 2017** – DJO Global, Inc. (“DJO Global” or the “Company”), a leading global provider of medical technologies designed to get and keep people moving, today announced their MotionMD® software solution has received security certification from The Health Information Trust Alliance (HITRUST). The HITRUST CSF, a widely-adopted information privacy and security framework, helps support MotionMD’s compliance with certain healthcare standards by providing a secure and protected platform for sensitive and private healthcare patient information.

MotionMD underwent an in-depth review to obtain the HITRUST CSF Certification, which demonstrates that the software’s security controls are consistent with national and international security standards including ISO, NIST, PCI-DSS and HIPAA. The process normalizes security requirements and provides clarity and consistency, reducing the burden of compliance with the privacy and security regulations that apply to healthcare organizations.

“We want our customers to feel safe when they provide sensitive healthcare information to our MotionMD platform,” said Terrence Weekes, DJO Global’s chief information security officer. “Since privacy and security are significant priorities for us, we continually strive to achieve the highest level of security for our systems. The HITRUST CSF Certification validates our efforts and provides an industry-recognized endorsement to our partners.”

MotionMD is an intuitive, web-based point-of-care solution designed to support claims management and inventory dispensing. This paperless software solution can help orthopedic clinics improve patient satisfaction, better manage billing compliance and streamline workflow by providing seamless interoperability with clinic records.

“I am proud of our team and the work they do each day to ensure patient health information is secure and protected within our network,” said Steve Ingel, president global bracing and supports. “Our industry leadership is further strengthened by our HITRUST CSF Certification and demonstrates we are a distinguished partner within the orthopedic device industry.”

**About DJO Global**

DJO Global is a leading global provider of medical technologies designed to get and keep people moving. The Company’s products address the continuum of patient care from injury prevention to rehabilitation after surgery, injury or from degenerative disease, enabling people to regain or maintain their natural

motion. Its products are used by orthopaedic specialists, primary care physicians, pain management specialists, physical therapists, podiatrists, chiropractors, athletic trainers and other healthcare professionals. In addition, many of the Company's medical devices and related accessories are used by athletes and patients for injury prevention and at-home physical therapy treatment. The Company's product lines include rigid and soft orthopaedic bracing, hot and cold therapy, bone growth stimulators, vascular therapy systems and compression garments, therapeutic shoes and inserts, electrical stimulators used for pain management and physical therapy products. The Company's surgical division offers a comprehensive suite of reconstructive joint products for the hip, knee and shoulder. DJO Global's products are marketed under a portfolio of brands including Aircast®, Chattanooga, CMF™, Compex®, DonJoy®, ProCare®, DJO® Surgical, Dr. Comfort® and Exos™.
